

# How to use the controllers?

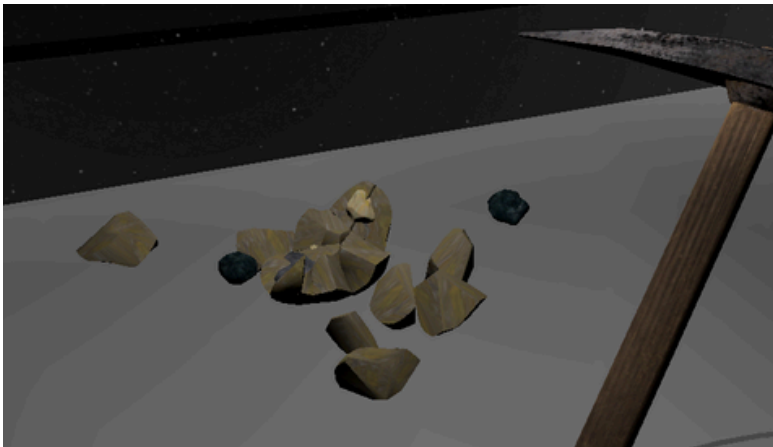

1. Thumbsticks  
2. Menu button  
3. Oculus button

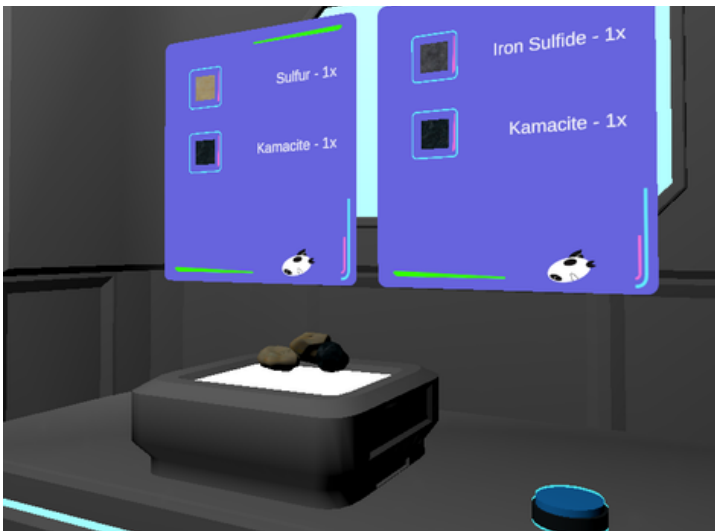

4. Battery covers  
5. Grip buttons  
6. Triggers

- **Look around** with the VR headset on to check out the game area, or use the **right-hand thumbstick** to rotate!
- Point at objects and use the **grip buttons** to pick them up!
- Move around in-game by **walking around**, or use the **left-hand thumbstick**!
- Use the **trigger buttons** to select menu items! Bring up the in-game menu by **pointing your right controller** on the **left hand button**!

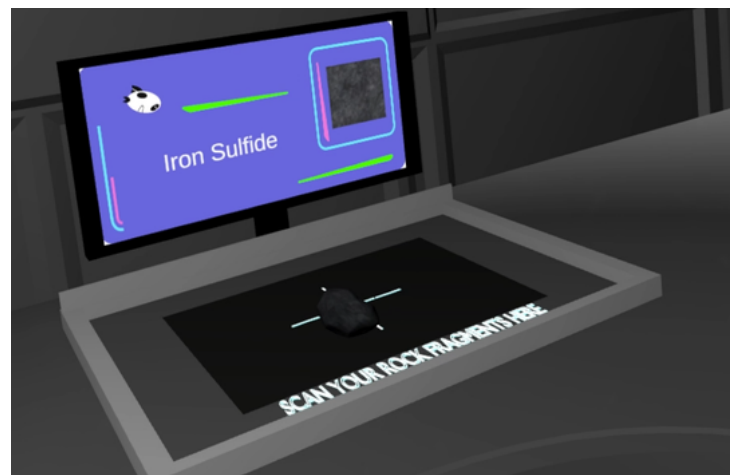

## How to play the game?

Place materials obtained from breaking apart the chunks on the scanner to identify what they are!

Spawn in asteroid chunks with a button, and take hold of the pickaxe! Break apart the chunks with the pickaxe to find some of the most common materials that we think make up Psyche.

Two delivery tasks will be shown at once. Pick one, and look for the materials listed. Once you identify the correct type and number of materials, place them on the delivery station and hit the button! Earn points for completing as many deliveries as possible. Aim for a high score!
